

SERVICE BULLETIN

Original Issue Date: 11/04
 Model: 8-32EOZD and 6.5-27EFOZD
 Market: Marine
 Subject: Single-Phase Reconnection Decal

Introduction

Some early model EOZD/EFOZD marine generator sets were shipped from the factory with an incorrect reconnection decal. Single phase marine generator sets equipped with an ADC 2100 should follow the reconnection details depicted in decal number GM35838 (see Figure 3).

Note: Refer to Figure 2 and Figure 3 and notice the change for 220-240 volt, 50 Hz, 2-wire reconnection.

Field Action

Check 8-32EOZD and 6.5-27EFOZD marine models located in your stock. If any of these units include the incorrect decal (229831) shown in Figure 2, cover the decal with the correct decal (GM35838). The reconnection decal may be located either on the top of the junction box or on the inside of the junction box. See Figure 1 for location.

Note: The installation manual (TP-6253) shows the correct reconnection information.
